# CEVA LOGISTICS

## Exciting progress is underway as work begins at the new CEVA LOGISTICS site in Hazelmere

As part of this large-scale project, we will deliver two expansive industrial warehouse buildings with a total combined footprint of 37,270m²— roughly equivalent to 5.2 football fields in size.

The sheer size of the development ensures ample room for high-efficiency warehousing and operations, tailored to meet the dynamic demands of today's logistics landscape and future challenges.
